

## What works - and doesn't work - in conservation?

FREE - November 13 in Palo Alto

### DESCRIPTION

Join us November 13 from 6:30-8:30 pm for a special event co-hosted by the Bay Area Tropical Forest Network (BATFN), Mongabay and [The Foster](#), watercolor artist Tony Foster's beautiful art gallery in Palo Alto.

Our guest speaker is [Zuzana Burivalova](#), a Princeton ecologist who specializes in tropical forest conservation and bioacoustic monitoring of forest ecosystems. For the past nine months, Burivalova has served as the research lead for a Mongabay project that aims to evaluate the effectiveness of several popular conservation interventions. Burivalova is now producing a series of featured articles in collaboration with Mongabay journalists. In her presentation, she will speak about her conservation effectiveness findings and methodology. Her remarks will be followed by discussion. Guests will also be able to view [Tony Foster's landscape watercolors](#), which are wonderfully presented at The Foster gallery.

Snacks and refreshments will be served.

Admission is free and open to all but please RVSP so we know how much food and drink to purchase.

### DATE AND TIME

Mon, November 13, 2017  
6:30 PM – 8:30 PM PST
